

Phishing Email Security Assessment Report

Generated: 2026-05-09 00:40:51.847865

Sender: harivardhanmallya04@gmail.com

Subject: Search

Verdict: High Risk (Phishing)

Risk Score: 6

Executive Summary

This email was classified as **High Risk (Phishing)** with a calculated phishing risk score of **6**. The analysis identified suspicious behavioral patterns commonly associated with phishing campaigns, including deceptive language, unsafe URL structures, and social engineering indicators. User interaction with links, attachments, or credential requests from this email is not recommended until legitimacy is verified.

Detected Threat Indicators

- Keyword detected: suspended
- Shortened URL detected: <http://secure-login-update.bit.ly/restore-access>
- Suspicious domain pattern: secure-login-update.bit.ly
- Insecure HTTP link detected

Recommended Security Actions

- Do not interact with embedded links or attachments until legitimacy is verified.
- Verify sender identity through official communication channels.
- Avoid sharing passwords, OTPs, or financial information through email requests.
- Report suspicious emails to the security or SOC team for further investigation.
- Perform reputation analysis on extracted domains before access.
- Enable multi-factor authentication on critical accounts.
- Delete or quarantine the email if malicious intent is confirmed.
